Light Characteristics

Beam Angle 10°

The **LED7013 Architectural Outdoor Flood** is an outdoor IP65 rated LED colour change floodlight capable of lighting up whole trees or buildings. It has 21 LEDs (7 Green, 7 Blue, 7 Red) and when used in conjunction with the **Wise Chameleon** pack can mix the colours together to make a scrolling spectrum of 1000 colours. The fitting has a flat base allowing it to be attached onto walls, fences or any other solid surface. It is available in either a 10° or 45° beam.

This product is also available as a complete kit which includes the relevant **Wise Chameleon**. A one button **WiseStyle** switch can also be purchased instead of the one button switch if you don't require as many functions and only want to cycle through each colour.
