Quicklink: Q175F

General

Colour	White
Construction	Plastic

Dimensions

Height	6mm
Length	250mm
Width	9mm

Electrical

Maximum Wattage	0.6W
-----------------	------

Light Characteristics

Watts Per Metre	2.4 W/m
-----------------	---------

The **LED Strip** is an extremely discrete and flexible strip primarily used for lighting up pelmets, coves, shelving, and any area which doesn't have a large amount of space.

The strips clip together without the use of separate couplers, allowing a consistent ray of light to wash onto any surface.

The fitting requires a 12V driver. We recommend the 'STRIP LED DRIVER', which will allow you to run 25 of the strips.

A 1m or 2m powercord is also required.
