STRIP LED YELLOW

250mm Yellow
Quicklink: Q1760

General

Colour White
Construction Plastic

Dimensions

Height 6mm
Length 250mm
Width 9mm

Electrical

Maximum Wattage 0.6W

Light Characteristics

Watts Per Metre 2.4 W/m

The **LED Strip** is an extremely discrete and flexible strip primarily used for lighting up pelmets, coves, shelving, and any area which doesn't have a large amount of space.

The strips clip together without the use of separate couplers, allowing a consistent ray of light to wash onto any surface.

The fitting requires a 12V driver. We recommend the 'STRIP LED DRIVER', which will allow you to run 25 of the strips.

A 1m or 2m powercord is also required.
