Length	180mm
Minimum Ceiling Depth	105mm
Vertical Rotation	25°
Width	105mm

Electrical

Maximum Wattage	100W (2 x 50W)
Voltage	12V

The **Adjustable Left to Right Rectangle Double** is an adjustable downlight with a very small aperture creating a dramatic vertical beam lighting effect ideally suited for lighting objects directly underneath it.

Each of the lights have a vertical tilt of 25° but going into opposite directions. It is impossible to have both lights going into the same direction.

A narrow beam lamp is recommended.

The Invisible range has been **designed to be overpainted in Situ** in the ceiling if necessary. The fitting is painted RAL9010 - 30% Gloss level which has a slightly matt surface, to which the emulsion or other paints will adhere to. The finish from the factory is good enough for normal use and will blend in with the most common ceiling finishes. The slightly matt finish on the product will allow it to be carefully repainted to suit any other ceiling colours.
