IP Rating	IP67

Dimensions

Diameter	98mm
Length	110mm

Electrical

Amperage	350mA
Maximum Wattage	3W

Light Characteristics

Beam Angle	45°
------------	-----

The **LED9031 Wall** is a 350mA 3W colour changing light fitting. It is used for illuminating flower beds, statues and small plants, whilst being attached to a wall through use of the bracket. This fitting is rated at IP67 meaning that it can be left outside indefinitely and can be left directly underneath water. This allows the user to colour change their water features without the need of buying extra specialist under water lighting.

This wall light is a plug and play fitting. Its leads are connected via male and female plugs which are tightened by a locking ring. The cables are rated as IP55 which means that they are splash proof from all sides but cannot be submerged in water. If you plan to install the fitting under water then the connections on the leads must be left on land.

The minimum requirements you will need for colour changing operation are:

- WISE RGB BOX 21W: Wise Chameleon Outdoor Box
- LED90 END CAP: End Cap
- LED90 POWER CORD: Power Cord
- LED90 WISESW7 SILVER OR WISESW7 WHITE: WiseStyle Switch 7 Channel Silver/White

The fitting has a beam angle of 45°.
