Dimmable	Yes
IP Rating	IP20

Dimensions

Cut Out	316 x 112mm (Length x Width)
Depth	91mm
Horizontal Rotation	45°
Length	307mm
Vertical Rotation	45°
Width	102mm

Electrical

Maximum Wattage	150W (3 x 50W)
Voltage	12V

The **Grid Trimless Triple AR70** is an adjustable downlighter that can take up to three 50W lamps, which can be angled in any direction.

This product comes with a mounting ring which is designed to be fitted into the ceiling and plastered in before the light fixture is put into place. The downlighter fits into the hole in the ceiling and will rest on top of the mounting bracket. Once the light is fitted there will be no trim unlike the similar *Grid Range* of products.

This version takes three low voltage AR70 B15d 50W maximum lamps (available separately). Each lamp has its own terminal, allowing you to wire all lamps to one transformer or for each lamp to have its own transformer. Using a separate transformer for each lamp gives better flexibility as each individual lamp can be dimmed or switched as required. If you wish to see detailed installation instructions, please click on the technical tab.
