Radio Frequency	433.9MHz
-----------------	----------

Dimensions

Depth	50mm
Height	160mm
Width	36mm

Electrical

Voltage	12V DC
---------	--------

The **RAKO Volt Free Contact RF Interface** can be used to select 4 scenes and off plus the master raise and lower functions. The volt-free inputs could be from contact closures of an alarm system, entry gates, passive infra red device, allowing simple wireless interfacing to a RAKO control system.

Basic configuration can be achieved using standard **RAKO Wireless Wall Plate Controllers** or **RAKO Hand-held Controller**. The **RAKO PC Software Suite** is required to access and program more advanced user functions.

The **RAKO 12V dc Power Adapter** is also required for this product.
