

RAVLC

Interface

Quicklink: Q18F6

General

Construction Plastic

IP Rating IP00

Radio Frequency 433.9MHz

Dimensions

Depth 50mm

Height 160mm

Width 36mm

Electrical

Voltage 12V DC

The **RAKO Living Control Interface** is used to control and activate lights, curtains, blinds and multi-room audio systems.

Connects directly into the RoomBox 6 CPU and transmits the required activation commands directly to each RAKO module in use. In addition, pre-defined IR commands are available, enabling you to use a standard learning remote control to operate your RAKO controlled lights. All scenes and selections are supported.

PLEASE NOTE: This product is designed for use with products that are not currently stocked - please call for more details. The **RAKO 12V dc Power Adapter** is also required for this product.
