Voltage	12V DC

The **RAKO Wireless Wall Switch** is a 7 button wall mounted control panel providing 4 scenes plus off and master raise and lower functions. The unit provides full scene programming. This unit is externally powered via a 12V DC power supply and uses coded radio transmission to ensure that the system can be installed with minimum fuss and disruption. Can be mounted anywhere, be it flush mounted to UK back-boxes or simply surface mounted to any flat surface using the patress provided.

RAKO Face Plate accessory kits are available in a variety of standard finishes to complement existing switches and interior design.
