---------	-------

The **RAKO Wireless Wall Switch** is a 2 button wall mounted control panel providing on and off control functions. The on button recalls preset scene one. This unit is externally powered via a 12V DC power supply and uses coded radio transmission to ensure that the system can be installed with minimum fuss and disruption. Can be mounted anywhere, be it flush mounted to UK back-boxes or simply surface mounted to any flat surface using the patress provided.

This particular version incorporates hidden screws to give the appearance of seamless fixing.

**RAKO Face Plate** accessory kits are available in a variety of standard finishes to complement existing switches and interior design.
