The **Park Lane LED** is a stylish modern bedside wall light designed not only to colour coordinate with your existing furnishings but provide a design feature in any room in which it is located. As well as the standard incandescent light produced from the main lamp, this fitting also has a fully flexible adjustable arm with bright LED, making it perfect for reading. It is completely customisable, mix and match from a choice of three finishes and three shade colours.

This fitting is the Park Lane fitting with an LED flexible extension, with the **shade available and purchased separately** to allow you to mix and match. The product image above is an example, showing the Park Lane LED in bronze with a **Park Lane Shade** in white. When purchasing this product, do not forget to order a shade. Shades are available in black, oyster and white square shape.

Constructed from steel and finished in bronze. The separately purchased shade is made from high quality fabric. This fitting is mains switching only and is fully dimming compatible. A 60W E27 lamp is available separately.
