IP Rating	IP00
Weight	160g

Dimensions
Base Width	70mm
Height	165mm

Electrical
Maximum Wattage	50W
Voltage	240V

The **Andromeda** 240V mono wire system fitting is constructed from metal alloy and polycarbonate.

This fitting requires two other products, **240V Double Mains Cable** and a **Fixing Kit with Wall Mains Supply**. The cable provides both power and suspension. The fixing kit includes tensioners and fixings to ensure the cable is taut and provides full support to the fitting. A mains supply box is included with the fixing kit to provide interface between your mains supply and the cable system.

A maximum 1000W of fittings can be added to the cable. Additional accessories are available that allow customisation of your system for the requirements of the room in which it is being installed.

This fitting takes a PAR16 GU10 50W halogen lamp (available separately).
