### General

Colour	White
Construction	Plastic
IP Rating	IP00

### Dimensions

Depth	35mm
Length	85mm
Width	85mm

### Electrical

Maximum Wattage	300W
Voltage	240V

The **Lyneo** makes all the difference to the ambience in a room. Instead of old-fashioned on/off lighting, you can match the level of light to the mood or activity. Changing a switch to a dimmer is simple. This range of slide dimmers comes in different finishes to match your decor.

The slider is used to change the light level. The on/off button turns the circuit on or off, with the blue LED status light indicating if the dimmer is in use.

Used in conjunction with a 1-10V interface such as a *Feelux 0/1-10V Interface* to control fluorescent strip lighting, for example.

### Important Notes

- Use this product to control fluorescent lighting fixtures
- Do not exceed the maximum rating of 300W
- This fitting will not work with LED lamps
- Not suitable for low voltage load types
