Dimensions

Cable Length	3m
Height	110mm
Length	78mm
Vertical Rotation	30°
Width	78mm

Electrical

Maximum Wattage	20W
Voltage	240V

The **Rock Cube Spot Uplight** is a 20W GU10 mains voltage table lamp. Ideal for location on furniture surfaces or on the floor to highlight walls or as a secondary light. This fitting is unswitched. A *2 Core In-Line Switch* can be purchased separately and wired to the fitting for on/off control.

A similarly designed floor uplight is also available.

Mr Resistor recommends using adhesive to ensure the table lamp is stuck securely to a surface. This is due to the base having a fabric lining so as not to damage delicate surfaces, which can make it slippery on surfaces such as glass.

Important!

If you are using the *Rock Table* with a 20W halogen lamp, please be aware that the fitting will get hot with use. If you are concerned about heat or looking for energy efficiency, then please use an LED or compact fluorescent lamp instead. Lamps are available separately.
