This **24 Hour 20 Amp Electro Mechanical Time Controller** control electrical equipment up to 20A resistive load. Easily set by the captive segment setting dial, the unit has a maximum of 48 ON & OFF programmes per day.

Features

- 20(12)A (4.6kW) loading
- 72 x 72mm plug-in base surface mount
- Captive segment dial
- Optional panel mount (clip included)
- Synchronous motor driven
- Time display for ease of operation
- Manual override to next programme change and permanent ON/OFF
- 15 minute minimum switching interval which can be increased in 15 minute steps
- Tamper proof transparent cover
- Controls electrical appliances (resistive loads) up to 4.6kW
- 12 amp inductive rating

Specification

- Operating Temperature: -10°C to 40°C
- Operating Voltage: 240V AC
- Switch Rating: Resistive – 20 amp (4.6kW), Inductive – 12 amp
- Conforms to Directives: 73/23/EEC & 89/336/EEC
