The **Contour Round** is a high power Cree LED downlight that provides a strong vibrant light. It can be used as either the primary or secondary source of light. It can be tilted by 20 degrees to adjust the light direction. Ideal as a replacement for standard halogen lamp downlights which generally consume more power and produce more heat. Complies with part L building regulations.

The fitting is constructed from aluminium with three 3W Cree LED's.

A driver is required with the Contour downlight.
