

LED POWER LEAD

2000mm
 Quicklink: Q1DD4

General

Colour Black
 Construction Plastic

Maximum 1 Watt LED's 2000mm

Dimensions

Cable Length 2mm
 Length 57mm
 Width 12mm

Electrical

Amperage 350mA

The **Contour Power Lead 3 Way Splitter** connects up to 3 contour LED downlighters, allowing them to be wired to a single set of terminals. The internal components of the splitter means the fittings will already be wired in series.

This power lead can only be used when 3 LED Contour Downlights are connected. You will NOT be able to use this lead if you only have 1 or 2 LED Contour Downlights. Using 1 or 2 downlights would require the fittings to be hard wired used series wiring.
