| Energy Efficiency Rating | A |
| Maximum Wattage | 24W |

Light Characteristics

| | |
|------------------------|------------------|
| Colour Rendering Index | 85 |
| Colour Temperature | 2700K Warm White |
| Lumens | 1600 lm |
| Lumens Per Watt | 67 lm/W |

Fluorescent T5 lamps come in a smaller size than T8 fluorescent lamps and provide big lumen output for visual comfort and performance. With many wattages to choose from, you can either maximise your lumen output or your efficiency. The quality, along with their outstanding energy efficiency, make them ideally suited for lighting large open areas such as offices, public buildings, warehousing, industry and supermarkets.

This lamp is 563mm in length from pin to pin.

Lamp Features

- 38% less glass and phosphors than T8 lamps which means reduced waste in landfills
- Lead free product
- Low mercury content
- Less lamps are needed to maintain same lumen output due to the high output design
- ROHS compliant and contains recyclable components
