Polished Chrome
Quicklink: Q1FAB

General

Colour Chrome
Construction Steel

Dimensions

Depth 25mm
Diameter 80mm

This **Mirror Adaptor** allows you to install your fitting into cutouts in existing glass mirrors. A metal sheet is fixed into the wall behind the mirror, with another connected on the front and attached to this to hold the mirror up and secure your purchased decorative light. Two plastic glass rings fit in between these metal plates to seal the cutout from water and to protect the mirror from damage. Simply thread your mains cable through the cutout to the fitting, which fits onto the extrusion and is fixed in place with an Allen key (not supplied). A polished chrome ring fits onto the front, ensuring seamless transition between your polished chrome fitting and your mirror.

Please note that this product is only compatible with the *Roma, Idaho, Tube and Arezzo* fittings.
