General

Construction Wood

Dimensions

Depth 12mm
Length 1m
Width 35mm

The **MDF Surface Extrusion Profile** comes in lengths of just over 1m and is used to house LED Tape, which keeps the tape light safe and out of the way.

For furniture corners, surfaces that form 90 degree angles, example: shelf attached to the wall at a 90 degree angle

Parts Required

Extrusions

As many lengths of extrusion can be used as is desired. They can be positioned end to end with each other to make an unlimited distance.

Diffuser

A diffuser is used to give the light a more even blend. Simply purchase the same amount of diffusers as you did with extrusions.

Will fit any tape with a maximum width of 10mm.
