

Nose Single Circuit Track Lights

Long Nose Single Circuit Track Light PAR16 240V

50W Black

MR. RESISTOR®
Lighting Specialist Est. 1968

TKLN1004

50W Black

Quicklink: Q20B2

General

Cap	GU10
Colour	Black
Construction	Plastic
Dimmable	Yes
IP Rating	IP20

Dimensions

Head Diameter	65mm
Head Length	105mm

Electrical

Maximum Wattage	50W
Voltage	240V

The **Long Nose Track** single circuit track mounted spotlight used in conjunction with our single circuit 240V track ceiling fixtures. It has a longer body than standard GU10 spotlights, meaning that elongated bulbs such as LED retrofit lamps can be used without the light source protruding.

The Single Circuit Track is a type of lighting system used in various environments, including commercial and residential spaces. It features a track containing a single conductive pathway, or circuit. In this setup, all the light fixtures connected to the track are controlled simultaneously. This simplicity can be advantageous for applications where uniform lighting is desired across a space.
