| Width | 90mm |

Electrical

| | |
|-----------------|------|
| Maximum Wattage | 50W |
| Voltage | 240V |

The **Invisible Adjustable Square** is an adjustable downlight designed to blend seamlessly into its surroundings. It has an unobtrusive one millimetre plate that sits practically flush to the ceiling when fitted and contains a baffle that recesses the lamp to reduce glare. The baffle is also hinged to allow the light source to be directed through a 40 degree arc from the vertical.

Please note: the ceiling depth for this downlight depends on the lamp choice. For a standard halogen GU10 lamp the depth is 85mm. For an LED GU10 lamp a ceiling depth of 115mm should be allowed.

The Invisible range has been **designed to be overpainted in Situ** in the ceiling if necessary. The fitting is painted RAL9010 - 30% Gloss level which has a slightly matt surface, to which the emulsion or other paints will adhere to. The finish from the factory is good enough for normal use and will blend in with the most common ceiling finishes. The slightly matt finish on the product will allow it to be carefully repainted to suit any other ceiling colours.
