General

Construction Plastic

Dimensions

Length 300mm
Width 10mm

The **Tape Extrusion Power Cord** is a 300mm vertical cable which fits perfectly through the hole of the extrusion power end, connecting to the tapelight. It is available in both single colour 2 wires or RGB 4 wires.

This type of vertical power cord is only essential when used with the aluminium extrusions. The MDF range do not have endcaps or power ends allowing the standard Tape Power Cord to be used.
