The **Momo LED** is a stylish bedside wall light with a fully adjustable two arm design to give ultimate flexibility in positioning. A switch is located on the base for easily accessible light control. It is ideal for reading books or surfing the Internet when positioned next to beds. The flexible LED extension provides an additional focused light source. This product is also completely customisable, complement existing soft furnishings by choosing from three distinctive finishes and two shade shapes and colours.

The fitting shown is the standard *Momo* with flexible LED light extension with an *Azumi/Momo Round Shade*. This is an example, the shade is available and purchased separately to allow you to mix and match. When purchasing this product, do not forget to order a shade. Shades are available in black and white in round and square forms.

Constructed from zinc and finished in matte nickel. The separately purchased shade is made from high quality fabric. A 60W maximum E27 lamp is available separately.
