Electrical

Maximum Wattage	150W
Minimum Wattage	25W
Voltage	240V

The **FlexiDimm** is an in line dimmer for use with halogen and incandescent 20-150W table and floor lamps. This dimmer is leading-edge dimming. It is small, light, discrete, easy to use and easy to connect.

It is regulated by a built in rotative potentiometer.

This dimmer is not a switch and will still be a live circuit even when the light source is dimmed down to 0%.
