The **Wired Bell Push** is a surface mounted classicly styled doorbell ideal for any home. The bell has a lighted push, the lamp is included. To operate the bell push please see options below.

Wiring Options

Option 1: Transformer Operated

Choosing a transformer removes the need for ever needing to change batteries. Select a bell/chime that is designed to work with a transformer.

Option 2: Battery Operated

This option requires the chime you choose to be battery operated.

Option 3: Wireless

This option requires a **Bell Push Converter (Wired to Wireless)**. This converter connects to a bell push. This then transmits a signal to a wireless chime/bell.
